A coleção de Tapetes Personalizados Express Design permite criar um tapete exclusivo através da combinação das nossas coleções de alcatifas. Escolha as referências, combine diferentes cores e alturas de pelo e defina as dimensões para desenvolver uma peça personalizada, adaptada ao seu espaço e ao seu estilo.

Com um processo de produção otimizado, a coleção Express Design oferece um prazo de execução mais reduzido comparativamente à Express Reflex, sem comprometer a qualidade dos materiais e dos acabamentos.

Pela sua natureza, este serviço apresenta algumas limitações na execução de determinados desenhos, nomeadamente ao nível da espessura e complexidade das linhas. Por esse motivo, cada projeto está sujeito a validação técnica, de forma a confirmar a sua viabilidade antes do início da produção.

O resultado são tapetes personalizados, produzidos com rapidez e rigor, ideais para quem procura uma solução exclusiva, funcional e adaptada a cada ambiente.

The Express Design Custom Rugs collection allows you to create an exclusive rug by combining carpets from our carpet collections. Choose the references, mix different colours and pile heights, and define the dimensions to create a bespoke piece tailored to your space and style.

With an optimised production process, the Express Design collection offers shorter lead times than the Express Reflex collection, without compromising the quality of the materials or the finishing.

Due to the nature of this service, there are some limitations regarding the execution of certain designs, particularly in terms of line thickness and complexity. For this reason, every project is subject to technical validation to ensure its feasibility before production begins.

The result is a collection of custom-made rugs, crafted with speed, precision and a high standard of quality, ideal for those looking for an exclusive solution tailored to any interior.

INFORMAÇÕES E MANUTENÇÃO

Foram realizados todos os esforços para representar com a maior fidelidade possível as cores, texturas e acabamentos dos nossos produtos neste catálogo e no nosso site. No entanto, a percepção das cores pode variar em função de diversos fatores, como a iluminação durante a captação das imagens, o processo de impressão, a calibração do ecrã ou a sensibilidade visual de cada pessoa. Devido às características dos produtos têxteis comercializados, todas as medidas apresentadas estão sujeitas a uma tolerância de $\pm 5\%$.

CUIDADOS E MANUTENÇÃO

PREVINA A SUJIDADE DESDE A ENTRADA

A melhor forma de preservar a beleza do seu tapete é evitar que a sujidade entre em casa. Coloque um capacho junto à porta de entrada para reduzir a entrada de poeiras, areia e outras partículas que podem danificar as fibras. Tenha também em consideração que os tapetes de tons mais escuros tendem a disfarçar melhor pequenas manchas e sinais de utilização do que os de cores claras.

MANUTENÇÃO REGULAR

Uma rotina de manutenção simples e consistente é essencial para prolongar a vida útil do seu tapete. A aspiração frequente remove poeiras e partículas abrasivas, ajudando a manter a textura, a cor e o aspeto original das fibras.

ASPIRE REGULARMENTE

Recomendamos aspirar o tapete pelo menos duas vezes por semana, ou com maior frequência em zonas de passagem intensa. Pequenas manchas ou marcas de sujidade devem ser tratadas assim que surgirem, utilizando um produto adequado para limpeza de tapetes. Antes da utilização, leia sempre as instruções do fabricante e teste o produto numa área pouco visível.

LIMPEZA EM PROFUNDIDADE

Para uma conservação ideal, aconselha-se uma limpeza profissional periódica. Este tipo de intervenção permite remover a sujidade acumulada em profundidade, revitalizando as fibras e contribuindo para manter o tapete em excelentes condições durante muitos anos.

CARE AND MAINTENANCE

Every effort has been made to represent the colours, textures and finishes of our products as accurately as possible in this catalogue and on our website. However, the perception of colours may vary due to several factors, including lighting conditions during photography, the printing process, screen calibration and individual visual perception. Due to the nature of our textile products, all stated dimensions are subject to a tolerance of $\pm 5\%$.

CARE & MAINTENANCE

PREVENT DIRT FROM ENTERING YOUR HOME

The best way to preserve the beauty of your rug is to prevent dirt from entering your home. Place a doormat at the entrance to reduce the amount of dust, sand, and other particles that can damage the fibres. Keep in mind that darker rugs tend to conceal minor stains and signs of everyday use better than lighter-coloured rugs.

REGULAR MAINTENANCE

A simple and consistent maintenance routine is essential to extend the lifespan of your rug. Regular vacuuming removes dust and abrasive particles, helping to preserve the texture, colour, and original appearance of the fibres.

VACUUM REGULARLY

We recommend vacuuming your rug at least twice a week, or more frequently in high-traffic areas. Minor stains and marks should be treated as soon as possible using a cleaning product specifically designed for rugs. Always read the manufacturer's instructions carefully and test the product on an inconspicuous area before use.

DEEP CLEANING

For the best long-term care, we recommend periodic professional cleaning. This allows deeply embedded dirt to be effectively removed, revitalising the fibres and helping to keep your rug looking its best for many years.
